Repairing instructions for the carpet piste (Repair kit 43-93/R)

- 1, Cut out the damaged spot carefully with the cutter tool. Take care not to break the rubber backing underneath the conductive material. Take out the cut spot with a knife or other tool.
- 2, Stick on the rubber backing the provided spot while pushing firmly.
- 3, Get the silver paint bottle,shake well for about 30 seconds and put the silver paint into the little gap all around the spot to keep the conductivity.
- 4, In case the piste on the repaired part doesn't work later again repeat the 3rd point to fix the problem.
